Get the Most Out of Your Bathtub

DoubleFlex™

Bath waste installations just became faster and easier. Introducing the new Mountain DoubleFlex™, the new bath waste system that is designed to handle misalignment problems. The secret is in the patented swivel joints at the overflow head and at the sanitary tee. We first incorporated this technology over 11 years ago with a swivel joint located at the overflow head; now we have also placed a swivel joint at the sanitary tee. What this means is that there is much more flexibility to compensate for misalignment when installing the bath tub. The DoubleFlex™ is available in both PVC and ABS as well as 3 different cable lengths to be utilized on any size tub.

Water Level with Our Immerse Feature

- 2" Additional Soaking Room

Immerse Yourself

The Mountain Plumbing "Immerse" feature allows you to have the most luxurious bathing experience you've ever had! It now comes standard on all Mountain Plumbing Products cable drains, allowing you to indulge in a more lavish bathing experience. The expertly engineered overflow has been developed for your tub to accommodate a near additional 2 inches of water. To fully take advantage of the immerse feature, simply fill your tub to the height you have been familiar with. Once seated and relaxed in your tub, the amount of displaced water will rise by approximately 2 inches and remain at this level. This additional water depth added to your tub will allow for you to be fully submerged, covering up your bare shoulders, and resulting in a more luxurious bath. It is the ultimate in getting the most out of your bathtub.

STANDARD DRAIN ROUGH-IN

Schedule 40 ABS & PVC Cable Operated

- Flexible Overflow Neck
Conforms to Any Bathtub Angle
- Includes DoubleFlex™ Adaptor
- Includes Immerse Feature
- Pipe Not Included
